Euro Notes Facts

- The different sizes and contrasting colors and relief patterns of euro banknotes help people – including the visually impaired – recognize the denominations.
- The notes come in 5-, 10-, 20-, 50-, 100-, 200- and 500-euro denominations.
- There are various security features in the notes, such as a watermark, security thread and hologram, to stop counterfeiters and help recognize a genuine banknote.

Euro Notes

Euro Coins Notes

- Advanced technical specifications were also developed for the coins, making illegal reproduction, especially for the 1- and 2-euro coins, extremely difficult.
- The eight denominations of coins vary in size, color and thickness according to their values, which are 1, 2, 5, 10, 20 and 50 cents, and 1 euro and 2 euros.

Sample Euro Coins
